● Seal Point Himalayan Cat

- Female - spayed
- 21 years old (takes daily medication for hyperthyroidism)
- Up-to-date on vaccinations, heart worm, and flea prevention!
- Front paws are declawed
- Prefers a home without dogs and cats
- Good with children!

Hello everyone!

My name is Gracie. I am 21 years old and am a Seal point Himalayan cat. I am sweet, loving, quiet, love to have my daily brushing (but not for too long), love to eat my food, and sleep most of the time but love to have my time getting loving pets from my owner. I sometimes get a spirit of energy and scamper across the floor, watch a bug for a long time and paw at it for play, and chase my foam ball. I really am no trouble. I did just learn that I have hyperthyroidism and I need to get my liquid medicine every morning. Even though I don't like it, I am good about taking it since I feel so much better. Oh, but I don't do that well with other cats and dogs.....I hide and growl.....

My current owner is moving to Arizona and I can't make that LONG trip in the car so I am looking for a retirement home. I might live a few more years! I am in good health and good spirits! Won't someone please take me in?? I need to find a home by the end of July.

Thank you and I am excited to find my new home!

Meow,
Gracie
